Fatih Konuk

Full-Stack Software Developer

fatihkonuk000@gmail.com github.com/fatihkonuk linkedin.com/in/fatihkonuk

Summary

Full-stack developer building enterprise web applications since 2023. On products with complex business rules, I take ownership of the entire process, from requirements analysis and workflow design to data modeling, APIs, user interfaces and delivery. I have built modular structures that adapt to changing requirements, as well as schema-driven dynamic interfaces. I adapt quickly to different technology stacks and use AI tools as a natural part of my development process.

Experience

Pievision Technology and Software A.Ş.

May 2023 – Present (3 yrs 5 mos)

Full-Stack Developer

October 2024 – Present (2 yrs)

Part-time · Remote

- **LabTrack (LIMS):** Took end-to-end development ownership of a laboratory information management system built for AnkaTheraHub at Ankara University; developed the entire frontend and most of the backend.
- Developed modules covering laboratory operations, from request management to equipment, inventory and reporting processes, on an extensible architecture in which form and list screens are generated from schemas defined on the backend.
- Designed and developed the data model and user flows for processing, tracking and visualizing analysis data obtained from laboratory instruments.
- Defined business rules and process flows during requirements analysis and feedback sessions; planned the development work and collaborated with the team on testing and release processes.
- **GoSellerGo:** Provided technical guidance to a three-person development team of students on the new version of a multi-tenant SaaS product that manages seller accounts across sales channels such as Amazon, Temu and Shopify from a single dashboard.
- Made the architectural decisions; carried out business analysis and task allocation together with the project manager, and gave the team technical feedback through code reviews.
- Set up the frontend project structure and personally developed some of the modules.

Intern

May 2023 – September 2024 (1 yr 5 mos)

Istanbul (Hybrid)

- **GLPD (LIMS):** Worked across frontend, backend and project management processes in a team of senior developers and a project manager on the first version of LabTrack, a laboratory information management system developed for LifeSci at Boğaziçi University.
- Took over responsibility for frontend development in the later stages of the project; extended the product's scope with new modules in line with the client's evolving needs.
- **Piemarine (piemarine.com):** Developed a yacht manufacturer's Turkish/English corporate website with an admin panel, from UI design through frontend and backend development.

Tech stack: Nuxt.js, Vue.js, TypeScript, Pinia, Vuetify, PHP, MySQL, Next.js, React, Redis, Docker, JavaScript, HTML, CSS, Node.js, Express, EJS, MongoDB, Jira

İlan İletişim A.Ş.

November 2025 – April 2026 (6 mos)

Full-Stack Developer

Remote

- Developed new features from backend services to the user interface and worked on improving existing services in an international development team, on the vartur.com and ilan.com.tr listing platforms built on a microservices architecture.
- Reported the team's weekly progress, enabling management to track project status on a regular basis.

Tech stack: NestJS, Fastify, Nuxt.js, Vue.js, TypeScript, MySQL, Prisma, Redis, Elasticsearch, RabbitMQ, Docker

Teknolist Yazılım A.Ş. February 2025 – October 2025 (9 mos)

Frontend Developer Part-time → Full-time · Remote

- Developed new UI features for the Okulistik digital learning platform; worked on the maintenance and improvement of existing screens.

Tech stack: JavaScript, HTML, CSS, PHP, Mustache, Next.js

Başarsoft Information Technologies Inc. August 2024 – September 2024 (1 mo)

Intern Remote

- Developed a GIS (Geographic Information Systems) web application that allows users to draw and select features on a map.

Tech stack: React, OpenLayers, .NET, PostgreSQL

Technical Skills

Languages	TypeScript, JavaScript, PHP, SQL
Frontend	Vue.js, Nuxt.js, React, Next.js, Pinia, TanStack Query, Vuetify, HTML, CSS
Backend	Node.js, NestJS, Fastify, Express.js, REST API
Databases & Messaging	MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, RabbitMQ, Prisma, TypeORM, Mongoose
Tools	Docker, Git, GitHub Actions, Jira, Trello, Claude Code, ChatGPT
Architecture & Methodology	Microservices architecture, multi-tenant SaaS, Agile/Scrum

Education

Tokat Gaziosmanpaşa University September 2020 – June 2025

Bachelor's, Computer Engineering | **Ranked 2nd in Department** GPA: 90.13 / 100

Languages

Turkish: Native **English**: Basic (reading technical documentation)
